Sehhaty

PROJECT SEHHATY

- **Introduction**

The Sehhaty application is the unified application for providing integrated health care to facilitate services for individuals

Sehhaty

● Problems

KSA have is noticed many problems in the care health system faced by the ministry of health and its citizens . The problems some are as follows:

- Difficulty extract the medical record and reports
- Difficulty get result of medical Imaging any time
- Difficulty finding a specialist doctor any time

• Proposed Solution

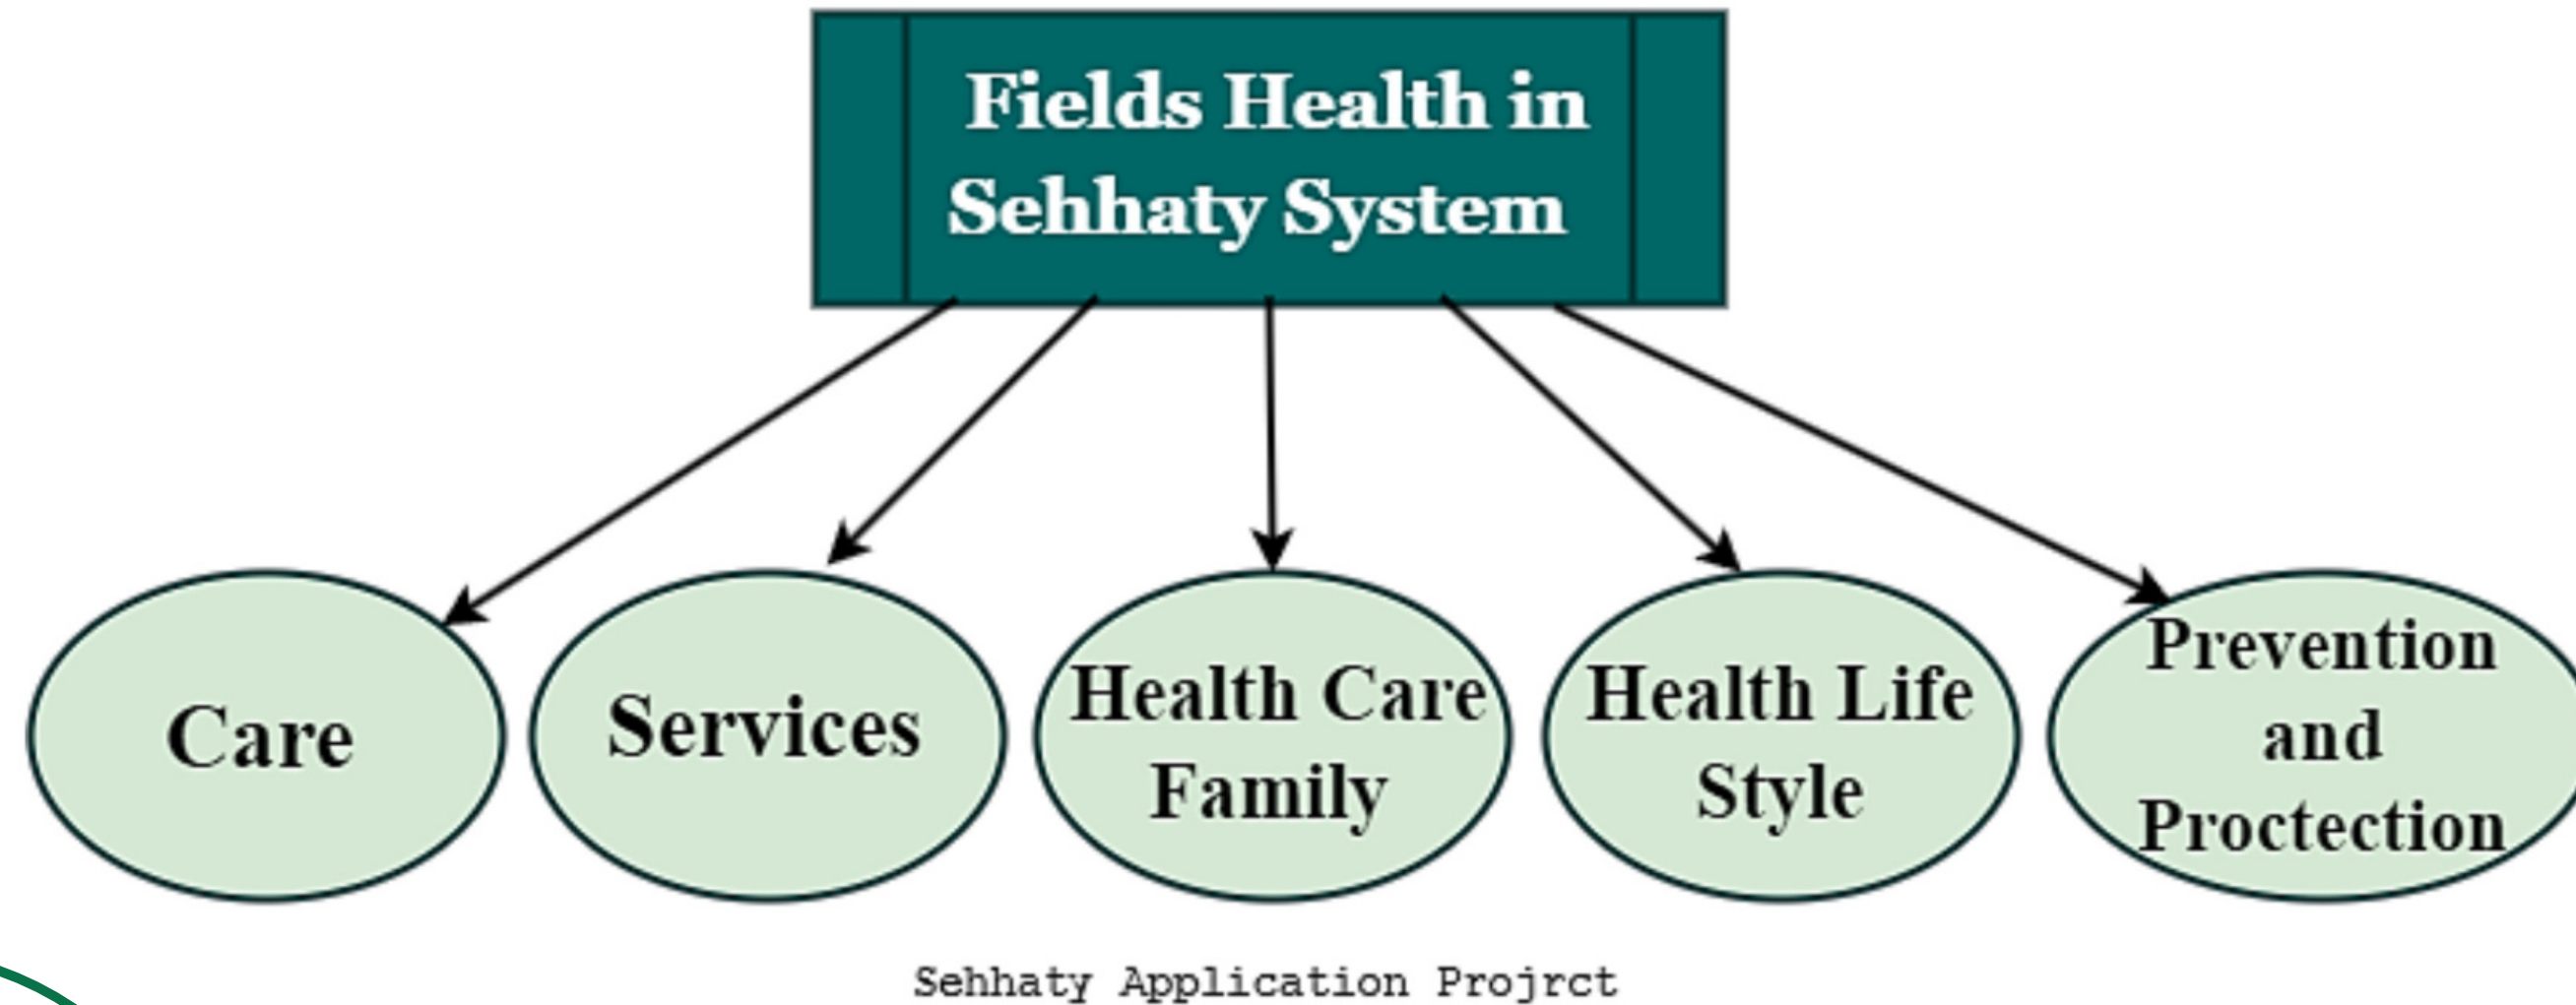

- providing a better experience for booking health appointments.
- reviewing prescriptions in addition to services and features to enhance the practice of walking.
- special services for women's health, and adding medications and reminders.

The Methodology in the proposed application is an Agile Methodological Approach , because the health services of the application are increasing based on the health needs of citizens .

• Work Plan

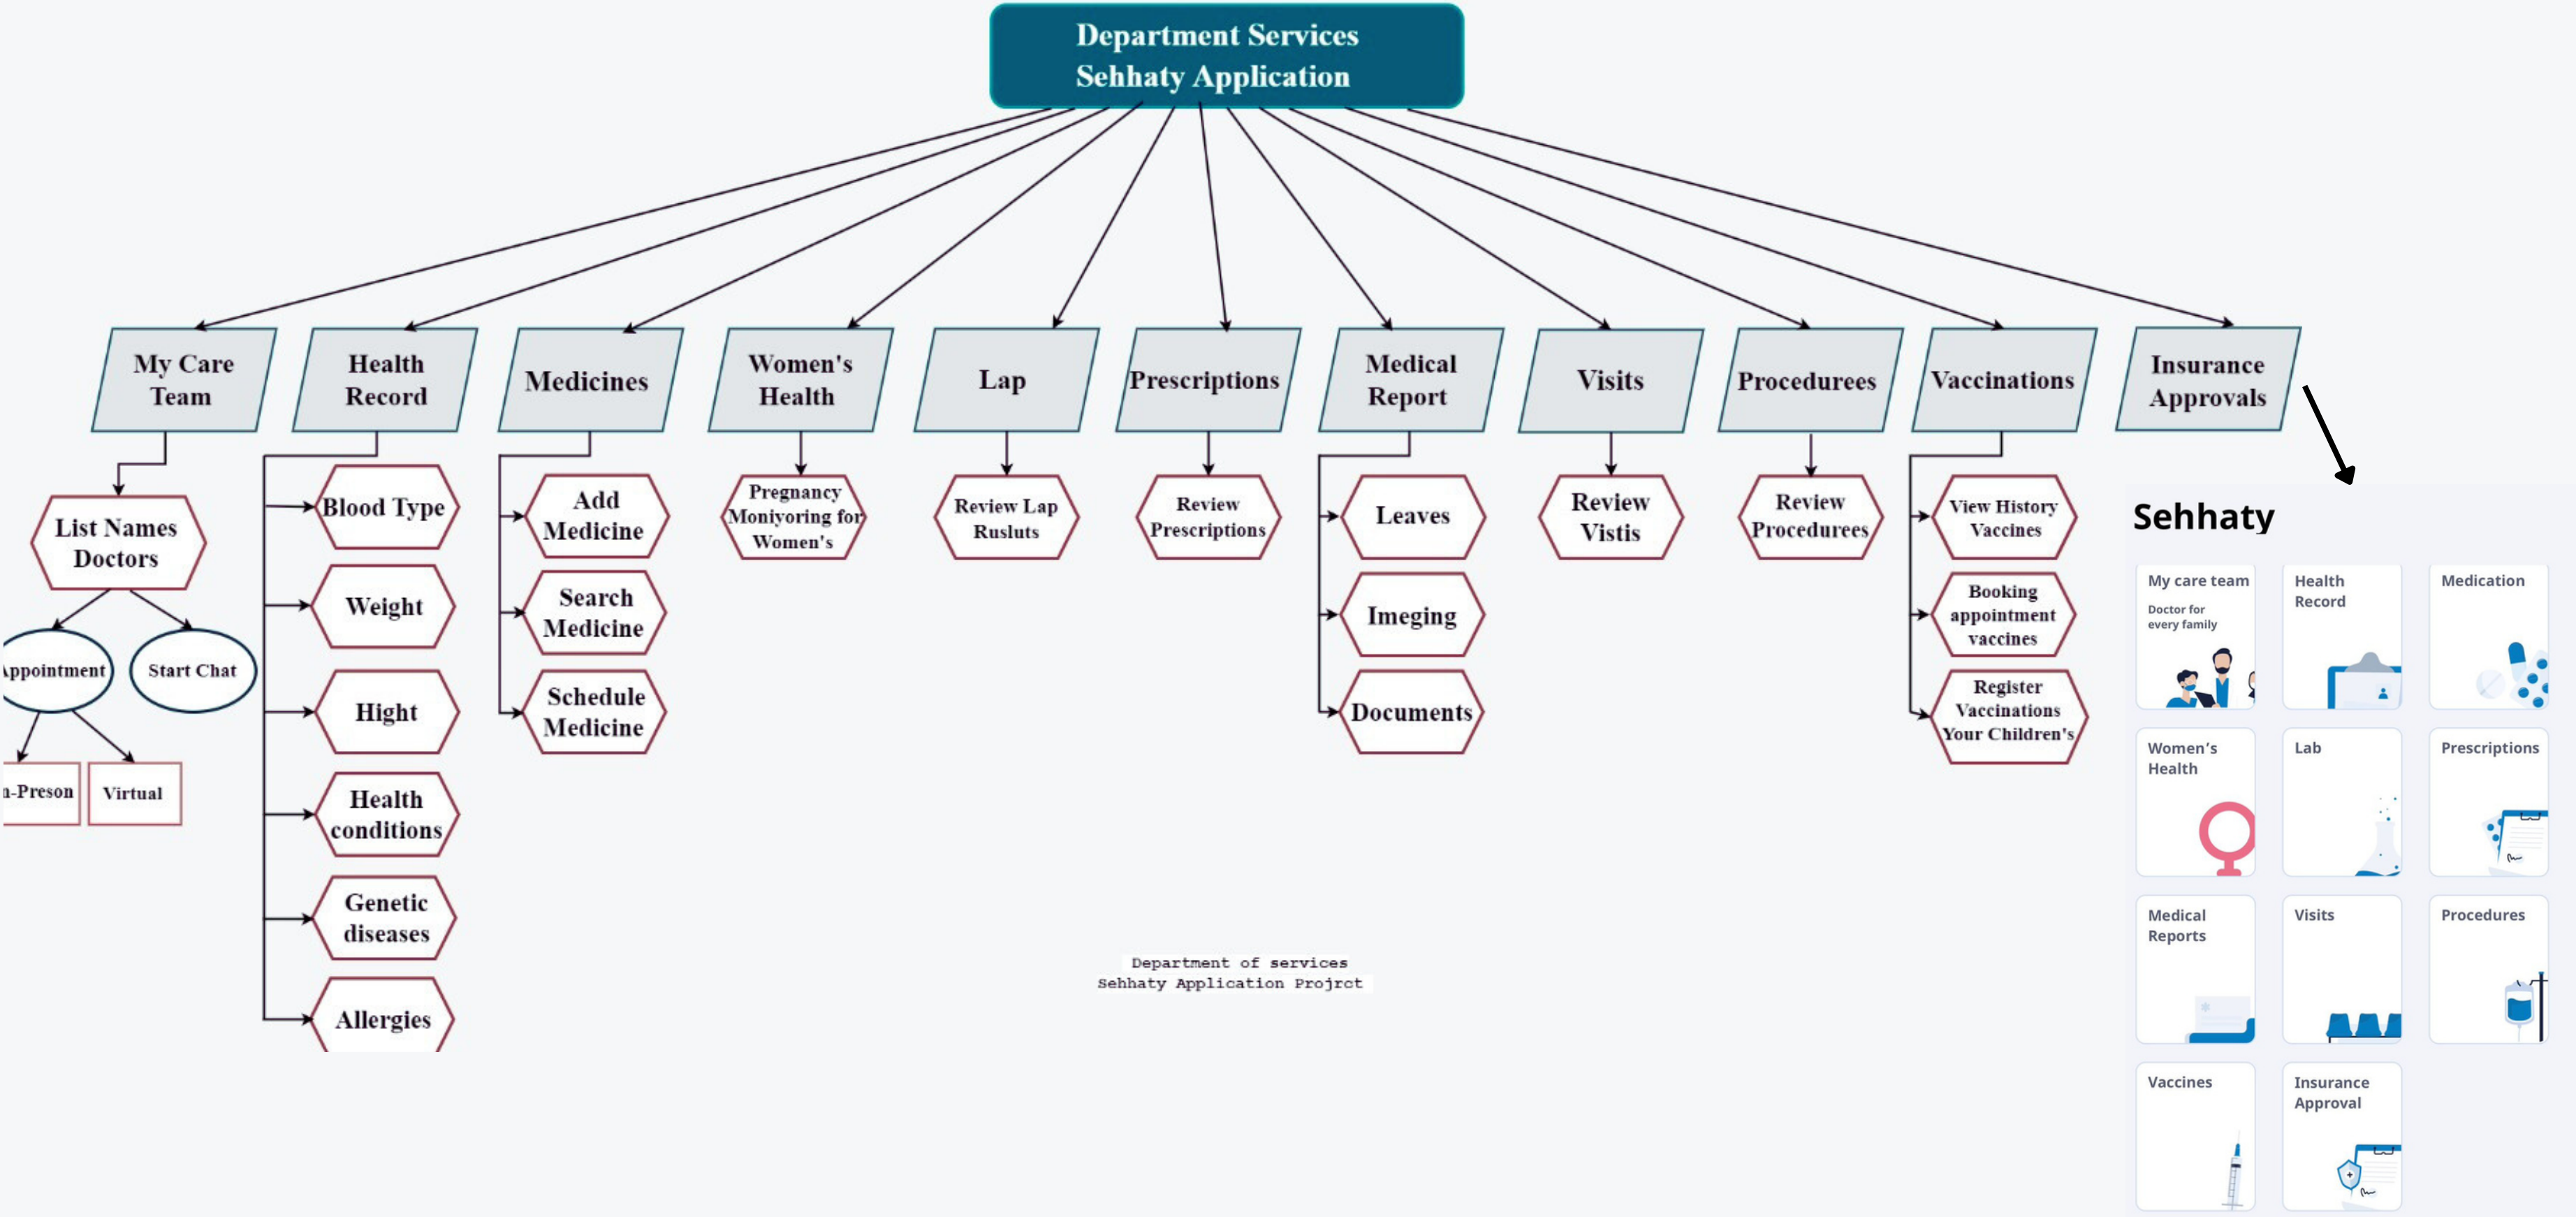

The Saudi Ministry of Health is interested in Sehaty Application To provide many health services in several areas ,

Sehaty system it focuses many care health :

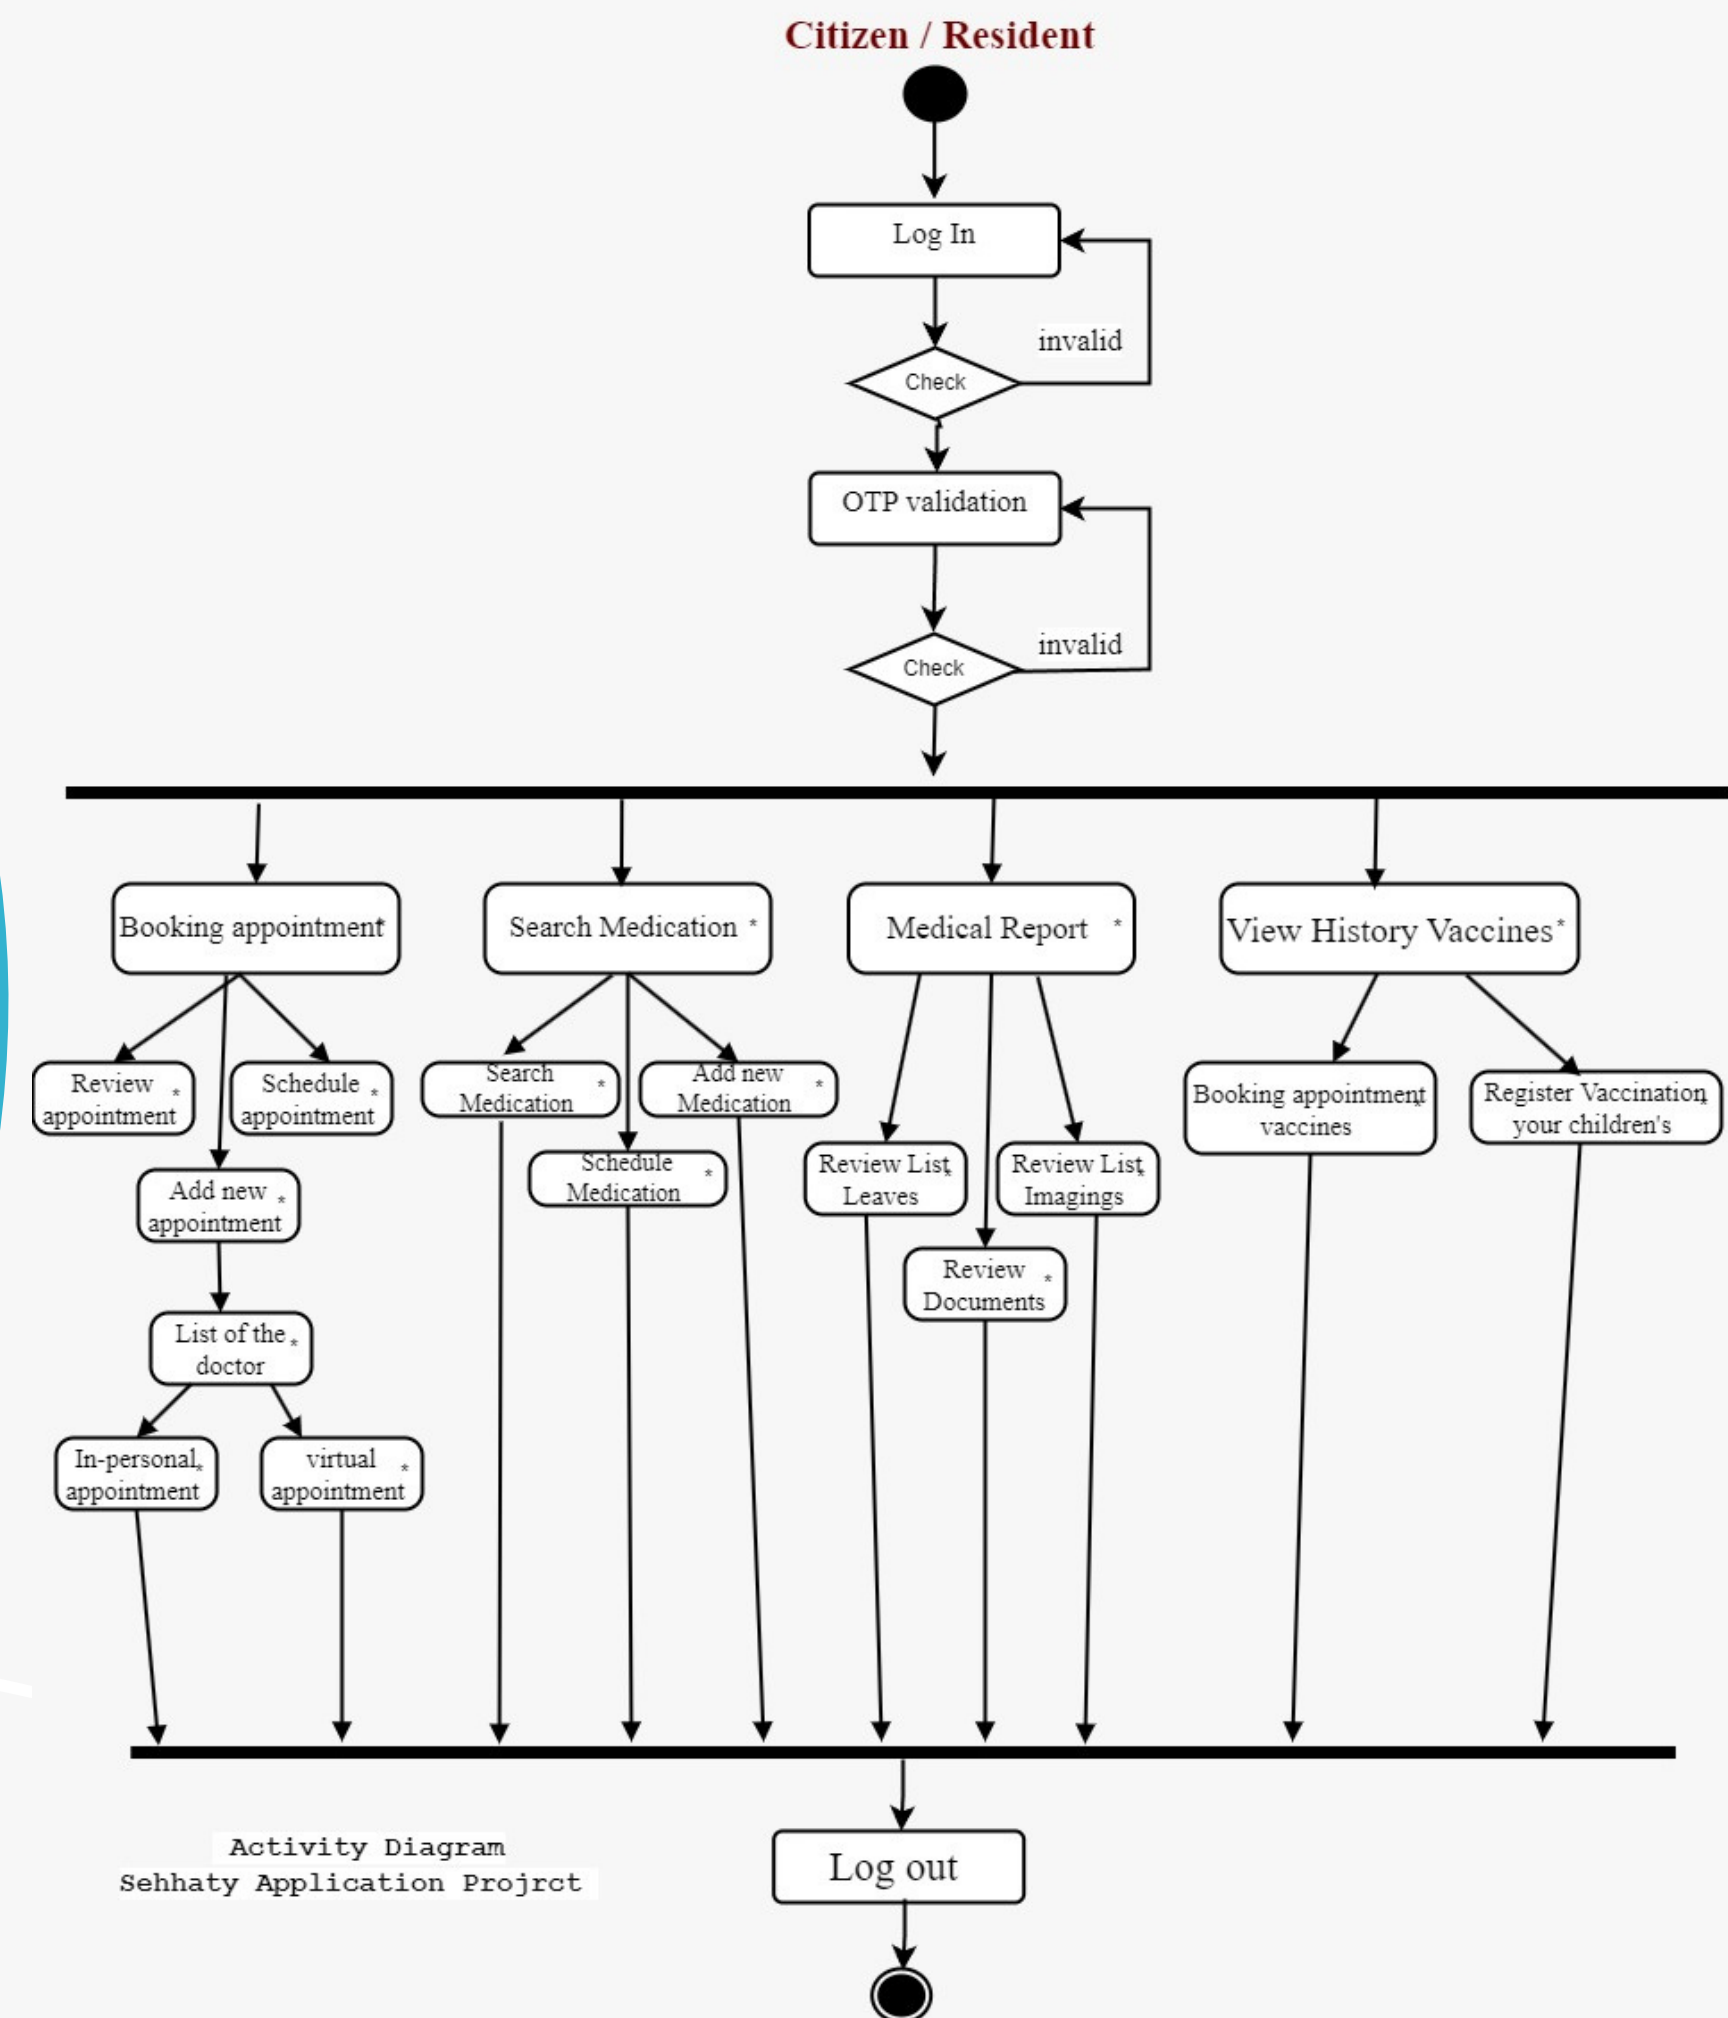

Some of the fields health In the application sehhaty have a multiple department of services
